Indatatech awarded contract with Bexar Met Water District

San Antonio, Texas – 4 May 2005 – indatatech today announced that it was awarded the contract to design, build and deploy the automated barcode inventory system for Bexar Met Water District in San Antonio. Indatatech teamed with Blue Clover, Secorp Technologies and Concepts for Creation Technology Innovations in order to give Bexar Met a state of the art wireless integrated barcode inventory control system.

Bexar Met started in 1945 by the Texas Legislature as a stand alone agency to supply water needs for the citizens of Bexar County. Today, the District has grown to supply water for over 70,000 residential and commercial accounts, and 200,000 people in Bexar, Medina, Comal and Atascosa counties.

“This is the first teaming event for indatatech” said Chris Fierro, VP, of Business Development for indatatech. “It will allow us to provide Bexar Met, a technologically advanced system for the lowest cost possible. They will see an immediate return on their investment which is what we want to give all our clients.”

Indatatech is a fixed asset management and supply chain integration company, headquartered in San Antonio, Texas. Indatatech has offices in Houston, and Atlanta and Roswell, New Mexico.
